„Efficiency of the Printing Company cannot only be improved by increasing capacities, but also with electric solutions implemented into core activity deeper and deeper. Our efficiency program started several years ago is the evidence to this trend, which resulted in double net sales revenue and 80% higher net profit compared to 2013 with only 24% increase in headcount. Electric solutions are not only represented in the offer of the Printing Company through supplementary biometric and track and trace services for security and business products, but they are there also in production and logistics. In the recent period we were proud of a product which is quite traditional still it was considered to be unique worldwide. Colour graphic was printed on the cover page of one of the passports made for export sale, thus it is a successful milestone in the life of the Company again.” – commented **Gábor Zsámboki, CEO of ANY Security Printing Company PLC.**
